

**Packaging solutions for the future:
ULMA Packaging at ProSweets Cologne 2026**

Cologne/Memmingen, January 20, 2026 – When the international supplier industry for the confectionery and snack sector meets at ProSweets Cologne from February 1 to 4, 2026, ULMA Packaging will once again be right at the heart of the action with innovative machines and sustainable packaging concepts. In Hall 10.1 at Stand G-009 / F-008, the company will present modern technologies for efficient and resource-saving packaging processes.

“ProSweets is one of the key platforms for us to show how product protection, cost-effectiveness, and sustainability can be combined,” says Thomas Blümel, Managing Director of ULMA Packaging GmbH.

The focus of the trade fair presentation will be on two machines that have been specially developed for the requirements of the confectionery, snack, and baked goods industry:

VTC 828R – a versatile vertical packaging machine for snacks, candies, nuts, and mini pastries. It enables Doystyle stand-up pouches with zippers, processes recyclable mono films, and can reduce material usage thanks to Plus-Cut™ technology.

FM 400 (premiere) – a new flowpack machine for MAP packaging. The long-dwell sealing head ensures absolutely tight seals at up to 150 cycles per minute. The IP66 hygienic design, stainless steel housing, and low material and energy consumption make it ideal for sensitive confectionery, baked goods, and protein-rich snacks.

About Ulma Packaging

ULMA Packaging is one of the leading suppliers of packaging machines. The company is headquartered in Oñati (Spain) and serves the German and Austrian markets from Memmingen in the Allgäu region. Its portfolio includes a wide range of machines and applications, including flow pack (HFFS), vertical (VFFS), thermoforming, traysealing, shrink wrapping, and stretch film technologies. ULMA Packaging operates internationally and has a network of 24 branches and numerous local sales and service partners in over 130 countries. The company is part of the ULMA industrial group, which has over 5,000 employees in nine business areas.
